

Annual Report

Growth in the past year

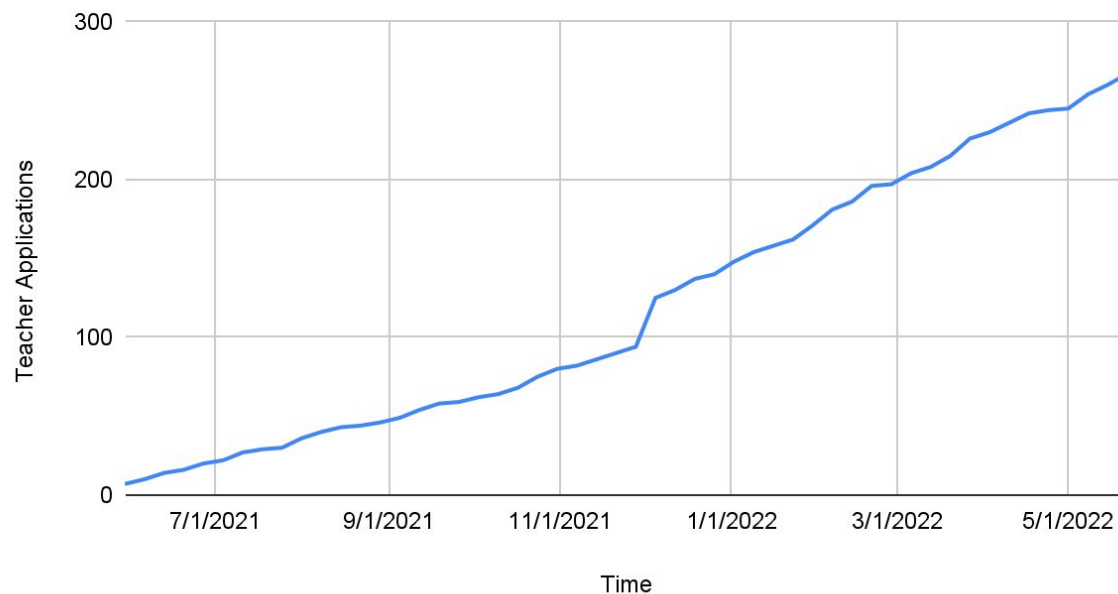

In June 2021, we decided to reset and start all classes anew. As a result, we had rapid student signups at that time. Since then, we have had steady signups as our organization continues to grow. On average, we received 38.4 signups per week, and we currently have 1273 students in our classes.

Student Signups vs. Time

Teacher applications have also been mostly steady over the past year. We average 5.1 applications per week, and we currently have 184 active teachers in YAPA Kids, from around the world.

Teacher Applications vs. Time

Goals

- Increase number of students: To grow our organization, our focus is to increase the number of students. A variety of outreach techniques will allow us to reach more parents and their children.
- Increase number of teachers: In order to account for an increase in students, we also want to increase the number of teachers. Our methods to do so include using social media, partnerships, and other outreach.
- Increase student & parent satisfaction: We want to ensure the satisfaction of our students and parents, who are the most important part of YAPA Kids. This entails engaging curriculum, proper communication, and energetic teachers. We measure student & parent satisfaction through a survey sent to all students and parents every quarter.
- Increase teacher satisfaction: We want to make sure our team members are engaged, satisfied, and overall fulfilled with their experience in YAPA Kids. We will make the teaching process as perfect as possible, and strive for the best team members. We measure teacher satisfaction through a survey sent to all teachers every quarter.

June 2021-May 2022 Financials

| Income | Amount |
|-----------------|---------------|
| donations | \$460.48 |
| TOTAL | \$460.48 |
